### A POTATO KING

"If I were a farmer boy, or a boy with-out capital, and wanted an early compe-tency, I'd start right out growing Pota-toes," said Henry Schroeder, the Potato king of the Red River Valley, whose story in the John A. Salzer Seed Co.'s Catalogue reads stranger, then a remarker. reads stranger than a romance.

That advice of Mr. Schroeder's, the self-made Potato king, comes from a warm heart, a level head, a potato king!

\$1.75; ten bushels, \$15.00. Here's another advice of the Red River Potato king. He says: "Plant a plenty when potatoes are plenty," or cheap, like they were last Fall—That's sound doctrine. Follow his advice this year and coming July and August and all Fall look out for 70c and 90c and \$1.00 Potatoes!

CORN. Who placed map, way at the top? Salzer's creatatoes great ty c corn, among them the earliest, heaviest eared, biggest yielders known.

We gladly mail our Catalog and sample package of Ten Fa-mous Farm Seeds, including Speltz, "The Cereal Wonder;" Rejuvenated White Bonanza e, "The Prize Winner;" Bil-Dollar Grass; Teosinte, Silo Filler, etc., etc.

Or Send 12c

And we will mail you our big Catalog and six generous packages of Early Cabbage, Carrot, Cucumber, Lettuce, Radish, Onion—furnishing lots and lots of juicy delicious Vegetables during the early Spring and Summer.

Or send to John A. Salzer Seed Co., Box 702, La Crosse, Win. twenty cents and receive both above collec-tions and their big catalog.

STIRRED TO COMBAT PLAGUE Many States Have Formulated Plans

to Fight Deadly Evil of Tuberculosis.

Bills dealing with tuberculosis are now being considered in 32 state legislatures, according to an announcement made by the National Association for the Study and Prevention of Tuberculosis.

In six states-Alabama, Arizona, California, lows, Tennessee and Washington-bills are being considered which call for the reporting and registration of all living cases of tubercu-Alabama, Connecticut, Iowa, Massachusetts, Pennsylvania and the tives who refuse to observe sanitary regulations and are a menace to others may be removed and detained in hospitals. In Alabama, Arizona, California, Illinois, Maine and Missouri, legislation permitting the establishsubsidies of \$3 to \$5 per week per patient are being asked for such in. God's most precious summary of his stitutions. A more or less complete love (John 3:1-16). reorganization of the state health work is sought in several states, especers are being considered.

Vanity makes a cheap chromo feel like an oil painting.

# INTERNATIONAL SUNDAYSCHOOL

(By E. O. SELLERS, Acting Director Sunday School Course, Moody Bible stitute, Chicago.)

### LESSON FOR MARCH 7

SAUL ANOINTED KING.

LESSON TEXT-I Samuel 9:17-10:1. GOLDEN TEXT-Fear God, honor the ing.-I Peter 2:17.

Because of the acts of Samuel the people petitioned for a king (ch. 8:5). They are told plainly what to expect if a king is set in authority (ch. 8:19). God, however, granted their petition and spoke "in the ear" of Samuel, saying, "I will send thee a man," telling him of the work which this man is to undertake (ch. 9:15, 16).

I. "Samuel Saw Saul" vv. 17-21. Saul was a man to gaze at and to admire (ch. 9:2). His fruitless search for his father's asses leads him to the city he is advised to consult the "man of God" about his difficulty-a good suggestion for us all. This experience (ch. 9:6.14) exhibits Samuel in a new light. The word "seer" indicates "one who sees." one who sees the things God makes manifest in dreams (Num. 24:4-16). While the word is similar to the modern term "clairvoyant" yet the Andrangen der vereinigten öfterreilatter are not the successors of these Old Testament "seers" or "prophets." They are rather the successors of the false prophets (Jer. 17:14), and of those who dealt with familiar spirits (I Chron. 10:13-14; Isa, 8: 19-20; 2 Kings 21:1, 2, 6). Saul evidently did not know Samuel (vv. 16-18).

Samuel took Saul with him for the night to take his mind off his father's | ten 150,000 bis 180,000 Mann beasses and to prepare him to receive tragen nebit bem entipredienden the word from God. Christians take Bricasmaterial. far too little time to withdraw themselves and take their restless minds off the things of time and sense to be still and hear the word of God. What were a few asses to Saul, to him "for whom all that is desirable in Israel" (v. 20 R. V.)? Christians who are heirs to the heavenly kingdom ought not to set their affections on the poor possessions of earth (Col. 3:1, 2; 2 Cor. 4:18). In response to Samuel's information, Saul disclaims any greatness; indeed, is he not from one of the least of the families of one of the smallest of the tribes (v. 21). Such humility gave great promise for Saul's future usefulness. Such was the mental and spiritual attitude of the man whom God chose to be king (ch. 15:17). It puffed him up, that the kingdom was taken away from him (ch. 15:23; 16:1; Luke 14:11; Heb. 13:1).

II. "Samuel Took Saul" vv. 22-24. Saul was then led into the guest chamber and placed in the chief seat. Read our Lord's parable found in Luke 14:7-11. Samuel then bade the cook bring the thigh; which was a choice those thus honored (Ezek. 24:4). Such 7:32). That which did not belong up-District of Columbia are working for laws which will require that consump laws which will require that consump laws and saul may have had the preference and eaten before the other lidt mir ibr Bentrum bei Barfdan lelbstverständlich ift von einer Birden and Saul may have had the preference and eaten before the other midst mir ibr Bentrum bei Barfdan lelbstverständlich ift von einer Birden and Saul may have had the preference and eaten before the other midst mir ibr Bentrum bei Barfdan lelbstverständlich ift von einer Birden and Saul may have had the preference and eaten before the other midst mir ibr Bentrum bei Barfdan lelbstverständlich ift von einer Birden and Saul may have had the preference and eaten before the other midst mir ibr Bentrum bei Barfdan lelbstverständlich ift von einer Birden and Saul may have had the preference and eaten before the other midst mir ibr Bentrum bei Barfdan lelbstverständlich in ests (v. 13), and Saul is made acquainted with the special honor conferred upon him. Following the feast, they return to Samuel's home, where ment of county or local hospitals for uel had private converse with Saul tuberculosis are being discussed, and (v. 25 R. V.). What that converse Morfton in der Michtung auf Thorn, ich Macht irgendwelde finanzielle-, in California, Illinois, Iowa, Maine, may have been we know not, but we Missouri and New Hampshire state are reminded of one such nocturnal conversation which gave to the world

Samuel poured oil upon Saul's head, Prophets, priests, kings and cleansed cially Kansas, Michigan, Minnesota, lepers were so anointed, a type of the Nebraska, Texas and Arizona. In In- anointing by the holy spirit (I Kings diana and Alabama bills providing for 19:15, 16; Lev. 8:12, 14:2, 16:18; Isa. full-time county and city health offi- 61:1; I John 2:20 R. V.). This act was also a symbol of entire consecration to God, and pointed forward to the coming king (Messiah, Anointed One) whom God himself would anoint

(Ps. 45:7). Saul was anointed to be "a prince" and to save God's people (ch. 9:16; they had sinned, and their sorrow was because of their own disobedience, yet God regarded their affliction (Ps. 106:43, 44). Only God's anointed ones can save (Isa. 61:1-3).

Saul's selected task was to save tines (See Luke 1:69-71). God's eye his ear is always open to the cry of the poor and needy; of innocent children suffering because of the sins of parents; of men defrauded of justice, But the delivering remedy will not be brought by any earthly king. Man-

kind is today crying for a king (somewill not have God to rule over them. Heedless of his warnings, blessed by his bounty, they struggle and scheme

to heal their own hurt. Saul's humility rapidly gave place to pride and pride to ambition, ambition to oppression, and finally to an untimely end, due to disobedience When our king comes the skillfully constructed scheme of man's govern ment, wherein graft and pride, ambition and lust, find such a prominent place, will be set aside for a kingdom wherein justice and love, equity and service, will be meted out to every man; one wherein ideals will become realities.

New Weapon for the Destruction of Airships.

Inflammable Bullet, Designed by an Englishman, Seems Capable of Doing the Work for Which It is intended.

Charles Dawson of Uckfield, England, the discoverer of the prehistoric skull at Piltdown some time ago, has since the war started, turned his attention to another subject, the Boston Evening Transcript states. He has invented a little article which he calls an airship destroyer, the object of the invention being the destruction of airships, balloons, and similar flight machines, which are mainly supported by inflammable gases. The airship destroyer is a very simple affair. It consists of an ordinary rifle, gun or pistol bullet, which is bolted at the apex to form a cavity of suitable size, and filled with yellow phosphorus. In the case of a regulation pattern of the army rifle, the conical bullet is bored or cast with a round hole at the apex to the depth of two centimeters (.77 of an inch) with a diameter of two and one-half millimeters (.09 inch). The cavity is filled with yellow phosphorus, and a small portion is allowed to project beyond the apex of the bullet. When the rifle is fired the phosphorus is heated by the discharge, and either commences to burn at once or is predisposed to flare on coming into the slightest contact with another body. For instance, as soon as the bullet hits the envelope or gas bag of an airship or balloon, it would burst into flame, if it has not already done so, and the gas would be ignited and the airship exploded. The phosphorus will continue through the air. being stimulated by the oxygen in the

atmosphere. when charged with phosphorus, can be adapted to any projectile now in use. "It has several advantages," says Mr. Dawson. "In the first place, it is much easier to fire at an airship with a rifle than to have to use a big gun, which would require to be got within range of the object to be destroyed. It would also mean that any destruction would be confined to the airship, whereas where shells are fired from big guns considerable damage may also be done to buildings by pieces of shell. Of course it would not be safe to use these cartridges in the ordinary course of things, because if one should alight on anything inflammable, such as a haystack, there would be fire. They are intended solely for the destruction of airships." The bullet is really a "flaming bullet." It is not an explosive bullet. Phosphorus does not explode, it only burns or flames in oxygen, or air, which is mostly oxygen.

Patterns by Kaleidoscope.

Doctor Pulfrich, one of the experts of the Carl Zeiss Optical company in Germany, has constructed a kaleidoscope on scientific principles and of mathematical accuracy. Its use is for making kaleidoscopic patterns for textiles, linoleums, decorations, etc., some a dust heap.-London Saturday Reof those it has produced being of extraordinary beauty. He calls it the photokaleidograph, because it is part of a camera that photographs the patterns it forms.

Spreading Tuberculosis Infection. Dr. Guy Hinsdale of Hot Springs, Va., points out that it is not the expired air of consumptives that carries infection, but the sputum and tiny drops of moisture coughed up by the patient that carry the bacilli and communicate the disease to others.

Introduced Cloarette to Englishman. Who started the cigarette craze in England? To the duke of Buccleuch. who recently celebrated his golden wedding anniversary, belongs this distinction. In 1856 he went to Russia to attend the coronation of Alexander II. Finding the cigarette very popular in that country, especially in St. Petersburg, he brought back the weed in this form to England, and English folk have smoked them ever since.

Bad Taste as Seen in Japan.

Roctor Aston, the scholarly Japanese secretary to the British legation in Tokyo, summarized what Kenko, the fourteenth century writer of "Tsure zure Gusa," considered to be "bad taste," thus:

Too much furniture in one's living

Too many pens in a stand. Too many Buddhas in a private shrine.

Too many rocks, trees and herbs in a garden.

Too many children in a house. Too many words when men meet. Too many books in a bookcase there can never be, nor too much litter in

Parasite Destroys San Jose Scale. A parasite which destroys the dreaded San Jose scale has been discovered. and is now being used in Pennsylvanta, where it has been highly successful in combating the ravages of the pest which has done such dame\_ to American fruit and nut trees. The parasite is the Chalcid fiv. which comes from the same part of China from which the San Jose scale first came. There the Chalcid fly has effectually checked the scale.

A Great Gift. "They say she is splendid in ama-

teur theatricals." "She's a wonder. She can make the most painful tragedy a source of genuine amusement."-Life.

Sharp-Pointed Bullet May Make Fearful Wound.

Range at Which Projectile is Fired and Age of the Man Hit Are Factors in Amount of Damage

Done. American army surgeons are convinced that under normal conditions all modern bullets are more humane than those formerly used, in spite of the fact that they travel at higher

speed and have a far wider range. They are so sharp pointed that when they strike the soft tissues alone they mate clean-cut, narrow wounds which heal very quickly. When, however, they take a sidewise twist, or develop irregular, jagged edges through previously striking or glancing off some hard object, they

have an explosive effect which pro-

duces just such terrible wounds as the

"dumdum." These effects are most

liable to occur in vital organs inclosed in resisting bony walls, like the brain or heart, and are nearly always fatal. The range at which bullets are fired and the ages of the men they hit have

been found to have a marked influence

The Diagram Shows How the Base of a Bullet Spins Like a Top in a Constantly Increasing Circumference. This is Why It Often Strikes Sidewise and Mutilates Like a Dumdum,

on the character of the wounds they make

The bones of younger men usually have a great amount of animal at ter, consequently are less brittle than those of older men. The less resist ance met by the bullet in the comparatively softer bones, at short ranges, permits the passage of the bullet without explosive effect. In the cases of the older and more brittle bones the bullet at long ranges causes great damage, especially as the bullet at these long ranges has become unsteady from loss of velocity and strikes the bone sidewise, thus transferring its energy over a greater area than if it had struck point on.

Owing to the change in the position of bullets fired at long ranges, the effect produced in the bony tissues is at first in the short ranges very severe from the high velocity, but in the midranges the effects are less sovere because of loss in velocity, and at long ranges the effects becate severe again because of the impact being made with the side of the bul-
